RELIANCE MEDICAL
'Leading First Aid'

Compliance needn't be complicated.

The unique benefits of the Spectra First Aid System™ ensure you have everything you need to meet your regulatory requirements in one simple modular solution:

First Aid guidance is provided in an illustrated format to assist in relevant first aid measures.

*The primary kit in any Spectra First Aid System™ panel is securely mounted to the panel yet can be quickly released and meet all the current national standards for workplace first aid provision.**

Accident Books are conveniently stored to remind first responders of their regulatory requirement to record workplace accidents at the point of an incident.

First aid kits are supplied complete with a security seal, so Health & Safety Managers can easily monitor first aid usage.

Storing plasters in different materials, the pilfer proof dispenser can be operated by the casualty with a single-handed procedure. Pulling out a plaster, strips the wrapper, allowing easy application without affecting sterility. Stock is secured by means of fixed wallets which are removed and refilled in seconds using a quick-lock mechanism and a unique key.

*First Aid provision should always be based on the levels of risk associated with each individual workplace.

Spectra™ is customisable to fit within any environment. It's easy to match the panels required with the level of risk in any workplace. Each panel will interlock with others to provide a comprehensive and complimentary first aid solution.

Our carefully thought out design makes products easily identifiable in an emergency and easy to access when you need them. Products can either be taken directly from each panel, or the appropriate kit can be removed and taken to the casualty.

The modern and smart design will feel equally at home in any office setting or warehouse.

Spectra™ is made from high quality ABS plastic, which not only means it looks great, it's also durable and strong enough to last in tough environments.

Each panel contains useful product information, a primary kit, designed for the intended location, and supplementary products to enhance the practicality of the panel.

At a glance, you can be confident that all primary Spectra kits are compliant by using the included security seal. The security seal can easily be broken by hand in the case of an emergency and, visibly indicates that components of the kit may be missing if it has been removed.

Two joining pieces for the top and bottom (included with each system), connect two or more stations together.

Main kits are securely attached to the main panel, yet easily removed in an emergency.

Each panel includes guidance signage to assist in relevant first aid measures.

All workplaces are unique, the first aid requirements are too. Choosing from seven individual options will let you create the Workplace First Aid System your risk assessment demands.

Workplace + Eye Wash

OR

Workplace + Burns + AED

OR

Select 1, 2, 3, 4, 5, 6 or even 7 panels for your system - any combination is possible ...once installed, Spectra™ supplies exactly what is needed, instantly.

AED + Biohazard + Catering + Eye Wash + Burns

WORKPLACE FIRST AID SYSTEM

Compliant to Latest BSI Workplace Standards.

CONTENTS
