TG7360

ULTRA-FINE POLYURETHANE COATED CUT LEVEL F GLOVE

HIGH CUT RESISTANCE

- **Ultra-Light Design**
  Engineered with a lightweight seamless liner using high-performance yarns to reduce hand fatigue while maintaining advanced protection for prolonged industrial use.
- **Cut Level F/A6 Protection**
  Provides EN388 Cut Level F / ANSI A6 protection, delivering high cut resistance for demanding industrial applications.
- **High-Performance Yarn**
  Constructed using advanced engineered yarns selected to deliver high cut resistance while maintaining flexibility, comfort and lightweight performance.
- **Precision Dexterity**
  Fine-gauge construction provides excellent fingertip sensitivity and freedom of movement, supporting precise handling and detailed tasks despite the high level of cut protection.
- **Flexible Comfort**
  Soft, stretchable materials conform naturally to the hand, delivering a close ergonomic fit without unnecessarily restricting movement.
- **Touchscreen**
  Touchscreen-compatible construction allows compatible devices to be operated without removing the glove, supporting productivity in modern workplaces.
- **PU Grip**
  Lightweight polyurethane palm coating delivers excellent grip in dry conditions together with moderate grip performance in light wet environments.
- **RCS Certified**
  RCS certified for the verified proportion of recycled material, with certification independently audited through Control Union under Textile Exchange requirements.
- **Bio-Based LXT**
  Treated with bio-based LXT technology to provide effective water repellency while helping enhance product durability and service life.
- **Verified Footprint**
  Product Carbon Footprint calculated and independently verified at 0.93 kg CO_2e, providing transparent environmental impact data for the product.
- **Secure Wrist Fit**
  Knitted wrist with an elasticated cuff provides a close, secure fit while helping reduce unwanted movement and the entry of loose debris.
- **Traffi Colour System**
  Green colour coding in line with the Traffi colour system allows quick identification of maximum cut-resistant hand protection for correct task selection.

Technical Specifications

Size Range	6-12
Machine Gauge	18gg
Liner	25% HPPE, 25% Steel, 20% Nylon, 15% Polyester, 10% Glass, 5% Elastane
Coating	Polyurethane
Colour	Green/Black

Cuff Edge Colours

Size	6	7	8	9	10	11	12
Colour							

Packaging

Qty/Pack	10 Pairs
Qty/Case	100 Pairs

Key Features

Touch screen · Water Resistance · PFAS Free · Dry Grip · Dexterity · Cut Resistance

Ideal for

Automotive Assembly · Aviation maintenance · Precision Task · Construction Work · Glass Handling · Utilities Maintenance

Certifications

CE UKCA

EN ISO 21420:2020 Cat. II

EN388:2016 4X42F

ANSI/ISEA 105:2024 A6 X X

RECYCLED BLENDED claim standard
12.0 % RCS certified post-consumer polyester Certified by Control Union CB-CUC-1371833
