Application

- ☐ Fix the sheeting to the outside of Scaffold or Fence with the recommended Elasticated ties
- ☐ Toggle Ties to the British Standard of a minimum of 1 fixing per m2
- ☐ Any fixings must be placed according to calculations for each project
- ☐ Overlap the lower sheeting externally for weather protection or overlap internally if used for containment

Description

Tri-force Digital FR Scaffold sheeting from BLC Construction supplies is a Flame retardant sheet

An economical option for use mainly at low levels when the risk of high winds is minimal and for short term applications

It can be used on traditional or modular systems and this high quality polyethylene sheeting is versatile and weatherproof.

Each sheet is designed with unique eyelet holes on a double width re-inforced band

Eyelets remain sealed until used helping to eliminate the effects of wind and rain.

These and other sheets in our range can be custom printed with bespoke graphics on site improving the look and offering a unique advertising potential for promoting your company or brand.
